SUMMARY

Computer Science senior at Imam Mohammad Ibn Saud Islamic University with hands-on experience building AI and machine-learning applications across the healthcare and space domains. Comfortable with the software development life cycle and skilled in Python, Java, and Swift, with practical data-analysis experience using pandas, scikit-learn, and TensorFlow. Seeking a cooperative training opportunity to apply AI and modeling techniques to real-world engineering challenges.

EDUCATION

Bachelor of Computer Science

Expected 2026

Imam Mohammad Ibn Saud Islamic University, Riyadh

- Team lead for the senior graduation project, taking it from requirements through to a working deliverable.

TECHNICAL SKILLS

Programming Languages: Python, Java, Swift

AI / Machine Learning: scikit-learn, TensorFlow, model development

Data & Tools: pandas, data collection, cleaning, and analysis

Concepts: Software development life cycle, research-oriented problem solving, team collaboration

PROJECTS

Yaqth — Epilepsy Seizure Prediction App

Jul 2025 – Present

- AI application that predicts epileptic seizures before they occur using health data collected from Apple Watch.
- Developed as part of a startup accelerator program.

Pancreatic Cancer Prediction System

Aug 2025 – May 2026

- AI application that reads biometric indicators from a smartwatch and passes them to a machine-learning model to assess pancreatic cancer risk.

Galaxy Hunters — NASA Space Apps Challenge

Oct 2025

- Built an educational game powered by an embedded AI model that identifies exoplanets from NASA's open datasets, teaching players how planets beyond our solar system are discovered.
- Team project working with large-scale astronomical data to drive both the game mechanics and the underlying model.

EXPERIENCE

Event & Operations Committee Member

Sep 2024 – Present

Information Security Club, Imam Mohammad Ibn Saud Islamic University

- Help plan and run hackathons and technical workshops and deliver training sessions for students.
- Contribute to securing sponsorships and partnerships to expand the club's reach.

AI Foundation Program Trainee

Jul 2025 – Aug 2025

Apple Developer Academy

- Selected for the first AI-focused cohort; completed an intensive five-week program on artificial intelligence and data-driven product development.
- Gained hands-on experience in data collection, cleaning, and analysis, and built a foundation in Swift and iOS development.

CERTIFICATES

- Apple Foundation Program — Apple Developer Academy (Aug 2025)
- Introduction to Data Science in Python — University of Michigan, Coursera (Dec 2025)
- Data Collection and Processing with Python — University of Michigan, Coursera (Dec 2025)
- Python Functions, Files, and Dictionaries — University of Michigan, Coursera (Dec 2025)

LANGUAGES

Arabic (Native) | English (Fluent)
